

Angola 3 40th yr in solitary confinement

April 17th marks 40 years since Herman Wallace and Albert Woodfox were framed for the murder of a prison guard at Angola Prison in Louisiana. They have been held in isolation - in solitary confinement ever since. Amnesty International has started a campaign against prolonged isolation and has cited their case.

Both Herman and Albert have hearings coming up this year which could finally result in the reversal of this injustice. Albert did have his conviction overturned in federal court a few years ago, only to have the 5th District Court overturn that decision. He is still fighting.
